Know-h

Slicing machines from Bizerba are always a decisive step ahead of their time. They set world-wide standards when it comes to hygiene, safety and energy efficiency. At the same time, they define an optimum level that is continuously surpassed to achieve our next generations of product developments. This includes innovative ways of handling materials as well as manufacturing precision, ease of use and the systematic reduction in the number of joints.

In short: every new slicer generation is the sum of perfectly matched, future-oriented details.

As we are never satisfied with the results, we are continuously looking for solutions that will make your daily work easier. You can expect the best: in manual mode the GSP V (Gravity Slicer Premium Valueline) has convincing features such as extremely high cutting quality, low product residue unsurpassed in comparison with the competition, numerous improved hygiene functions and lower power consumption than ever before.

OW

Like no other manufacturer, Bizerba is more than familiar with practical applications since we are totally committed to close customer support, competent advice and we offer a large reliable service network. In this way, the lessons learned flow directly into technological innovations.

Hygiene Safety Energy

The Bizerba GSP V features smooth surfaces with no corners or edges, freely accessible cleaning areas and simple dismantling of individual components. The large distance between the blade and motor tower and the compact design with the power switch fitted in the housing make it easy to clean the machine.

High quality anodised aluminium (Eloxal) makes the slicer almost indestructible. Remnant holder, blade cover and fixed parts are very simple to remove. The carriage can be tilt out when it is placed in basic setting at a cutting thickness of below "0". The blade is resharpened by a compact sharpener that is fitted in an instant. The sharpener can be washed in a dishwasher after use.

The GSP V slicing machine cuts thick or thin. No pasta is too soft and no ham too hard. A large product aperture handles bulky products with the greatest of ease. The blade and carriage are tilted at an angle of 40° to permit non-contact product feed.

A wide rear wall and a fixed tilt carriage assure a high level of safety in use.

The motors of the Bizerba GSP V are extremely quiet and run with a much lower power requirement: compared with other machines on the market, the GSP V has 35% less power consumption. In standby mode it even has zero power consumption. This is good for the environment and even better to save running costs. Day in, day out, year in, year out, and all round the clock.

Sliding grooves in carriage plate, gauge plate and blade cover: these are all conditions for ergonomic operation that is gentle on the product.

Removable sharpener: easy to operate by placing in a precise sharpening and removal position. Fully protected against unintentional contact.

Raised feet for better cleaning of the counter surface under the machine.

Surface finishes:
anodised aluminium (Eloxal)
Carriage tilt: 25°
Carriage height: high

*Raised up on machine housing:
no uncontrolled dripping from the
product tray to the counter or floor.*

*Blade cover and deflector: de-
flects sprayed particles from the
product and is easy to
remove together with fixed parts
for cleaning*

*Gutter on gauge plate: minimises
the risk of bacterial contamination
caused by residual liquids.*

*One-piece blade guard ring with
integrated attachment: easy to
clean and attached seamlessly by
fixing elements to machine hou-
sing.*

*Rotary knob to adjust thickness
with fine adjustment in 0 - 3 mm
range: precision slicing and
maximum yield for low product
residue so far unattained by
other competitors.*

*Carriage rear wall, hand guard
and remnant holder made of
transparent plastic: very easy to
use and maximum safety due to
excellent all-round protection.*

"We can truly rely on these solutions. For the whole life cycle of the machine."

Josef Urban, Packlhof Managing Director

J. Urban

"So easy to cut large products, every slice is as neat as the other – first rate!"

Andrew Ramsay,
Managing Director, Scotland

Andrew Ramsay
